WHAT COLOUR IS YOUR LIFE?

COLOUR PLAYS AN IMPORTANT ROLE IN OUR DAY-TO-DAY LIVES AND INFLUENCES OUR MOODS.

COLOUR CREATES AN ATMOSPHERE AND TRANSMITS FEELINGS AND LIFESTYLES. COLOUR GIVES A ROOM A PERSONAL TOUCH AND MAKES IT REFLECT OUR FEELINGS, OUR PERSONALITY, OUR TASTES AND EVEN OUR ATTITUDE TOWARDS LIFE.

THE PASSION OF QUARTZ COMPAC FOR COLOUR IS EVIDENT IN ALL ITS COLLECTIONS, FOR YOU TO CHOOSE A COLOUR THAT MAKE YOUR PROJECTS COME TO LIFE.

Range designed by Karim Rashid

All colours are available in Polish and Matt finish, except:

N New. Only Available in polish finish

P Only available in pergamo finish

O Also available in OVO finish

Cleaning and maintenance

Maintenance

Generally speaking, and due to their exceptional characteristics concerning their physics and chemical composition, QUARTZ COMPAC materials only need to be cleaned regularly with a neutral cleaning product or detergent, and then rinsed with water and dried with a dry cloth or absorbent kitchen paper.

To remove any stains or remains of oil and grease, wine, vinegar, lemon, soft drinks, coffee, etc. on a QUARTZ COMPAC surface, just wipe over with a damp cloth and neutral detergent, then rinse with water and dry.

Below are some simple ideas for treating commonplace problems:

1. Grease stains: dilute a small amount of detergent with water and rub the stain with a cloth. Immediately rinse with water.
2. Lime scale stains: pour vinegar (or any diluted weak acid solution) on to the surface and leave for 1 minute. Rinse with water.
3. Silicone: use a razor blade and small amount of solvent (acetone or ethanol).

Precautions

Do not fit QUARTZ COMPAC in areas subject to intense sunlight and do not expose to UV lamps.

Do not place hot objects directly on top of the QUARTZ COMPAC counter top (frying pans, saucepans, etc.).

Do not use water repellents or sealers to bring out the shine.

Do not use paint stripper, caustic soda, oil removers or products with a pH value higher than 10 or chlorine-based products. If bleach or solvents are used, immediately rinse with water. Never leave the bleach or solvents permanently in contact with the surface.

The material used for both floors and counter tops must not be polished.

Separate the counter top from extreme external heat sources.
